Comptroller's Directive No. 2-07
Attachment HE-10A
Schedule of Cash, Cash Equivalents, and Investments at June 30

As defined

Cash – the standard medium of exchange (paper currency) that must be readily available for the payment of current obligations, and it must be free from any contractual restriction that limits its use in satisfying debts.

Cash Equivalents – instruments or investments of such high liquidity (original maturity of 90 days or less) and low risk that they are virtually as good as cash. Examples are a nonnegotiable certificate of deposit, money market fund, Treasury bill, and monies in the State Non-Arbitrage Program (SNAP) fund*, and the Local Government Investment Pool. Whether an asset is a cash equivalent is determined only once based on the length of the original maturity when the asset is first acquired.

Investments – securities and other assets acquired primarily for the purpose of obtaining income or profit with an original maturity greater than 90 days. This includes securities, which are transferable financial instruments that evidence ownership or creditorship.

Security – generally, an instrument evidencing debt of or equity in a common enterprise in which a person invests on the expectation of financial gain. The term includes notes, stocks, bonds, debentures or other forms of negotiable and nonnegotiable evidences of indebtedness or ownership.

Note*: SNAP Individual Portfolios may include cash equivalents and/or investments depending on what makes up the portfolio. This is why there is a Restricted SNAP Individual Portfolio – cash equivalent and a Restricted SNAP Individual Portfolio – investment line item.

**Directions for
the “Cash
Equiv. & Inv.
NOT w Tr” tab**

According to GASBS No. 40, institutions that have cash equivalents/ investments not held with the Treasurer of Virginia and SNAP Individual Portfolio amounts will need to report more detailed information about the risk of their cash equivalents and investments. This spreadsheet requests the necessary information DOA needs to properly report in the CAFR.

List cash equivalent or investment by type and issuer:

In prior years, institutions had to provide information by type of cash equivalent or investment. While DOA is continuing to request this information, DOA will also need each issuer (further broken by each issue) for most cash equivalent and investment types. This information is needed to satisfy the concentration of credit risk for GASBS No. 40. DOA is also requesting any applicable ticker symbol **and** CUSIP number for each issue. (The ticker symbol and CUSIP number are needed to help DOA in sorting all the issuers to ensure there is no one issuer greater than 5% of net assets or plan net assets for any particular fund.)

Note: **Ginnie Mae, EXIMBANK, and SBA** are the only asset backed security that should be included with U.S. Treasury and Agency Securities. This is because it is explicitly backed by the U.S. Government. Securities such as **Fannie Mae, Sallie Mae, and the Federal Farm Credit Banks** are **NOT** explicitly backed by the U.S. Government and should not be included in U.S. Treasury and Agency Securities.

Example: For the cash equivalent or investment type “Common and Preferred Stocks,” the institution would list each issuer such as General Electric Corp. The institution would also list their ticker symbol “GE”. Because it is an equity security, no credit quality rating would need to be given. The institution would then classify the custodial rate risk for this security.

Credit Quality Rating (AAA, BB, Unrated, etc.):

List the applicable credit quality rating. The credit quality ratings of cash equivalents and investments in debt securities (corporate bonds, corporate notes, etc) as described by nationally recognized statistical rating organizations (rating institutions) must be disclosed.

Obligations of the U.S. government or obligations **explicitly** guaranteed by the U.S. government are not considered to have credit risk and do not require disclosure of credit quality. Negotiable certificates of deposit are also exempt from credit quality ratings. Repurchase agreements are exempt from credit quality ratings **only** if the underlying security is explicitly guaranteed by the U.S. government. The credit quality ratings of external investment pools, money market funds, bond mutual funds, and other pooled investments of fixed-income securities should be disclosed. **If a credit quality disclosure is required and the investment is unrated or not rated by any rating agency, the disclosure should indicate that fact that the investment is Unrated. Under no circumstance, should the rating information for any investment be left blank.**

DOA’s rating drop-down list in the “Cash Equiv. & Inv. NOT w Tr” tab provides standardized symbols for commonly used ratings of Standard & Poor’s and Moody’s. Agencies may also refer to these two rating agencies’ website for standardized rating symbols if certain ratings are not included in the drop-down list. **If a rating is not in the drop-down list, contact DOA. Agencies should pay close attention to the rating symbols’ letter case as a different letter case may symbolize different rating definition by different rating agencies.**

Interest rate risk (i.e. maturity) of each cash equivalent and investment:

The interest rate risk of debt investments must be disclosed by investment type and amount. DOA has selected the segmented time distribution method as outlined in GASBS No. 40. This requirement will require the institutions provide, by amount and issuer, the maturity of their debt investments.

GASBS NO. 40 does not require separate disclosure for cash equivalents and investments. Therefore, cash equivalent and investment amounts would be listed in one of the investment column maturities (less than 1 year, 1-5 years, 6-10 years, greater than 10 years) depending on the investment securities that have maturities. Most equity type investments do not have a maturity and their total would only be reported in the “category 3” and/or “uncategorized” columns in the custodial credit risk section.

Negotiable certificates of deposit should be classified as cash equivalents or investments depending on the original maturity. Negotiable instruments are securities that are normally sold in \$1 million units and that can be traded in a secondary market. **Non-negotiable certificates** of deposit should always be reported as cash equivalents in the “Less Than 1 Year” column. Non-negotiable instruments are time deposits that are placed by depositors directly with financial institutions and that are generally subject to a penalty if redeemed before maturity.

Custodial credit risk:

Per GASBS No. 40, the requirement to disclose cash equivalents and investments as categories 1 and 2 is no longer necessary. These amounts should be reported in the uncategorized column. If the security, however, meets the following criteria, the security must still be reported as Category 3.

- Uninsured,
- Not registered in the name of the government, and
- Are held by either the counterparty or the counterparty’s trust department or agent

Note: Investments in external investment pools and in open-end mutual funds are not exposed to custodial credit risk because their existence is not evidenced by securities that exist in physical or book entry form. Securities underlying reverse repurchase agreements are not exposed because they are held by the buyer-lender.

List the total custodial credit risk that is considered category 3 and the amount that is uncategorized (remaining amount) for each issuer. For debt securities, the total of these two columns should equal the sum of the interest rate risk columns mentioned above or an error message will appear. Equity securities (common, preferred stock, index funds, equity index and pooled funds, and real estate) will not have a maturity, and their total would only be reported in the custodial credit risk section.

Total Reported Amount:

The reported amount column will automatically total from the amounts listed as category 3 and uncategorized in the custodial credit risk columns of the spreadsheet.

An “Error” message will appear for debt securities if this amount does not agree to the sum of the interest rate risk amounts entered. The overall total of category 3 and uncategorized cash equivalents and investments must agree to the amount reported at Part 3 in the “Detail” tab of the spreadsheet. If it does not, an “Error” message will appear in the “Detail” tab.

**Directions for
the “Foreign
Currency Inv”
tab**

List the **fair value** of **each** cash equivalent/investment types subject to foreign exchange risk. Foreign exchange risk is the risk of an investment’s value changing due to changes in currency exchange rates and/or the risk that an investor will have to close out a long or short position in a foreign currency at a loss due to adverse movements in exchange rates. The total amount must agree to Part 4 in the “Detail” tab.
